

**CALL FOR LUNAR SCIENCE AND
TECHNOLOGY 2011**

FAQ

1. Who can apply?
2. Do I have to pay any application fees to apply to this call?
3. Can the same applicant person present more than one idea?
4. I am applying for more than one idea, should I create one account for each one?
5. I am applying to the Call but my idea may need to exceed the constraints (V_{max} , M) stated on the *BMT.LST.2011-Guide for Applicants* document. Would my idea still be eligible?
6. Can I add graphs and annexes in order to make clearer my idea?
7. Who will evaluate the ideas received?
8. I am not satisfied with the evaluation outcome. Do I have the possibility of making allegations or to start a redress procedure?
9. I have passed the Call for Ideas phase, can I immediately receive the 15.000€ award?
10. When will I be considered to complete the Call for Proposals phase?
11. The panel agrees that I have properly delivered all the documentation of the Call for Proposals phase. Can I receive now the 15.000€ award?
12. I am the Call for Lunar Science and Technology winner and I need more than the 200.000€ first prize to develop and materialise my idea; can I ask the Barcelona Moon Team for more funds – if I justify them?
13. I am the Call for Lunar Science and Technology winner; will my experiment be launched to the Moon without restrictions?

1. Who can apply?

Any physical person; may he or she be student, engineer, professor or other - alone or representing a research group or a company - without citizen or country restrictions.

2. Do I have to pay any application fees to apply to this call?

No, there are no application fees.

3. Can the same applicant person present more than one idea?

Yes, he or she can.

4. I am applying for more than one idea, should I create one account for each one?

No, only one account has to be created for each applicant. All ideas submitted by the same applicant must be uploaded using the same account.

5. I am applying to the Call but my idea may need to exceed the constraints (V_{max} , M) stated on the *BMT.LST.2011-Guide for Applicants* document. Would my idea still be eligible?

Yes, the ideas which exceed the indicative constraints will be taken into account through the selection process. However, they might have less possibilities of being selected.

6. Can I add graphs and annexes in order to make clearer my idea?

Yes, you can. They must be uploaded with the following label: *BMT.LST.2011-CFI-Graphs_Acronym of the project* or *BMT.LST.2011-CFI-Annexes_Acronym of the project*.

7. Who will evaluate the ideas received?

The evaluation panel will be composed of international specialists and renowned professionals from the fields of Aerospace Science and Technology. The specific composition will remain as confidential during the process.

8. I am not satisfied with the evaluation outcome. Do I have the possibility of making allegations or to start a redress procedure?

No, tribunal decisions are not open to appeal and are considered definitive.

9. I have passed the Call for Ideas phase, can I immediately receive the 15.000€ award?

No, you must complete the Call for Proposals phase in order to be rewarded with the 15.000€ award.

10. When will I be considered to complete the Call for Proposals phase?

You will be considered to have completed the Call for Proposals phase if after the evaluation of the panel, the panel agrees that all the required documents have been properly delivered.

11. The panel agrees that I have properly delivered all the documentation of the Call for Proposals phase. Can I receive now the 15.000€ award?

Yes, you can.

12. I am the Call for Lunar Science and Technology winner and I need more than the 200.000€ first prize to develop and materialise my idea; can I ask the Barcelona Moon Team for more funds – if I justify them?

No, the maximum amount of the prize is not negotiable but you still can look for external partners and sponsors.

13. I am the Call for Lunar Science and Technology winner; will my experiment be launched to the Moon without restrictions?

No, prior to the launch, your experiment must be certified to fly in a space mission. If your experiment is not certified to fly in a space mission, it will not be launched to the Moon with the main rover.
